

INSIGHTS FROM LEADERSHIP

A Message from Preston Smith, President of Premier Anesthesia

In our latest video series, Preston Smith, President of Premier Anesthesia, highlights the company's mission to improve patient care and lives through customized practice management solutions. By highlighting the importance of transparency, efficient and effective providers, and a provider-friendly culture, he emphasizes allowing hospital leaders' control to maximize allowable revenue and manage expenses, underscoring the need for a balance between financial success and quality patient care.

The Sudden Effects of Private Equity in Healthcare Management

Private equity firms often bring promises of better efficiency and profits, but their rapid changes can disrupt stakeholders. These alterations can reshape the organization's structure, operations, and finances, leading to instability. For anesthesia providers, such as anesthesiologists and CRNAs, these changes can feel sudden, affecting job security, pay structures, and independence, and can also impact patients and the wider healthcare environment

Addressing the Knowledge Gap When Private Equity Meets Anesthesia Management

Private equity companies are increasingly investing in the healthcare industry, taking over a variety of medical centers and specialized departments. This influx of private investment can offer medical facilities new funding and business approaches. Yet, the involvement of these firms can sometimes create problems, especially in specialized fields such as anesthesia. This is often due to the investors' limited grasp of the intricate nature of healthcare operations.
